This table is for information purposes only and does not provide legal advice. The information, in particular on the possibility of use, only reflects our opinion and requires a risk assessment by the respective company and a correct configuration of the tools. We will be happy to assist you with this. The above considerations cover data protection, but not other areas of law such as copyright (for copyrighted material, you should not use third party content with tools that will use your data for their own purposes). Please also note that the provisions and offers change frequently (the version of the information is stated below).

Further information on law and ethics in the use of artificial intelligence is available at vischer.com/ai.
